### Coronavirus Disease 2019 (COVID-19)

The Cal OES State Operations Center (SOC) activated 03/02/20 at 0700 hours in support of the California Department of Public Health (CDPH) Medical Health Coordination Center's (MHCC) statewide response to COVID-19. Cal OES will continue to provide resource coordination for the COVID-19 event, as well as situation status reporting and advance planning across multiple areas.

### Situation Overview

- **California State of Emergency Proclamation**

On 03/04/20, Governor Gavin Newsom declared a State of Emergency for California, as a result of the global COVID-19 outbreak that began in December 2019, to make additional resources available, formalize emergency actions already underway across multiple state agencies and departments, and help the state prepare for broader spread of COVID-19.

- **Executive Order N-33-20**

On 03/19/20, the California State Public Health Officer and Director of the California Department of Public Health ordered all individuals living in the State of California to stay home or at their place of residence, except as needed to maintain Continuity of Operations of the Federal critical infrastructure sectors.

- **Global Health Advisory**

On 03/19/20, the U.S. Department of State issued a Global Health Advisory at Level 4 (Do Not Travel) due to the global impact of COVID-19.

- **FEMA-4482-DR-CA**

On 03/22/20, President Trump approved Major Declarations FEMA-4482-DR-CA (DR-4482) for the COVID-19 Pandemic.

### **Confirmed Global COVID-19 Cases – Per Worldometers COVID-19 Live Updates as of 08/18/20 at 1000 hours:**

- 22,173,219 (+251,500) total confirmed cases in 213 countries
- 779,976 (+5,068) total deaths

### **Confirmed United States COVID-19 Case – Per Centers for Disease Control and Prevention (CDC) as of 08/18/20 at 1100 hours:**

- 5,422,242 (+40,117) total confirmed cases
- 169,870 (+520) total deaths

### **Confirmed California COVID-19 Cases - Per Medical Health Coordination Center as of 08/18/20 at 1100 hours:**

- 632,667 (+4,636) total confirmed cases

- Please see attached California Health & Human Services (CHHS) Agency / Cal OES Joint Situation Report for additional details.

# **SITUATION SUMMARY**

## **Transmission Emergency and Heat Event**

Phase II actions of the California Heat Contingency Plan are taken as a result of the National Weather Service's (NWS) issuance of Excessive Heat Warnings with poor overnight recovery for an Operational Area over a period typically three or more days. Phase II of the Heat Contingency Plan has been activated from Friday, 08/14/20 through [Thursday, 08/20/20](#), due to forecasts of dangerous and excessive heat for portions of Inland, Coastal, and Southern Regions. The extended heat wave has heightened energy demand, causing the California Independent System Operator to issue grid warnings and temporarily escalate into Stage 2 and 3 System Emergencies, prompting rolling blackouts across the state to secure California's energy supply.

Per NWS:

- High Risk and Very High Risk heat impacts across portions of Inland, Coastal, and Southern Regions expected through at least Thursday, 08/20/20.
- Heat events are not unusual for this time of year however the extended heat wave with poor overnight recovery can be dangerous.
- Several heat-related warnings are in effect through Thursday in affected areas.

## **Activations**

- All Cal OES Regional Emergency Operation Centers are activated at [Level 2](#)
  - Operational Hours: A Shift: 0800 hours – 2000 hours, B Shift: Duty Officer

Additional Details:

- Please see the attached Cal OES Situation Cell incident report for additional information related to the energy emergency and heat event.

## **EQTV Situation Report on Willits, Mendocino County Earthquake Series**

Since 08/18/20 at 1755 hours, there has been a series of low magnitude earthquakes. There have been approximately 25 earthquake events from 1.0M to the largest 4.0M reported in the area 6 Miles ESE of Willits, in Mendocino County. Dr. Steve Bohlen of the California Geological Survey indicated these events are interesting from a scientific point of view, but not likely a risk to life or property due to their rural location. Historically, the largest earthquakes since 1920 included five events ranging from M4.1 to M4.8 (excluding this event).

The three largest events are:

- 1755 hours: updated to 4.2 verified and at a depth of 4.7 miles
- 1843 hours: 3.5 verified at a depth of 4.1 miles
- 1859 hours: 3.8 verified at a depth of 3.4 miles
